Option Add Bonus

Adds a 378 sq.ft. bonus room over the garage, with stairs located as pictured. Accommodating the stairs changes the calculated main floor heated living space to 2508 sq.ft.

Moves the garage door to the front face of the house. Great for narrower lots where side access is limited. Note: This modification removes the front alcove "bumpout" from the garage, reducing the garage to 567 SqFt

Option Garage Front
